Information in this study has been obtained by Medical Insight, Inc., from sources believed to be reliable. While Medical Insight believes the data provided herein to be accurate, no expressed or implied guarantees regarding accuracy or adequacy are made. Product and corporate data can change very quickly and without notice and Medical Insight continually updates its research products. Because of this, certain figures in Medical Insight reports may differ from corresponding figures in earlier reports, even if those reports were issued relatively recently. Furthermore, current economic conditions are contributing to a highly volatile market, in which actual results often diverge significantly from estimates developed by manufacturers, analysts and others, resulting in a revision of projections. Therefore, while Medical Insight will provide an explanation of figures in any of its reports, only the most recent reports contain Medical Insight's latest estimates.

M.I.I Professional Biography

Michael Moretti
President
Medical Insight, Inc.

Michael Moretti has served as a medical industry analyst and strategic advisor for more than 20 years. As an industry consultant, Mr. Moretti specializes in strategic business development projects and high-growth, emerging market segments. He provides custom reports and confidential market studies for a variety of clients, including global medical and pharmaceutical companies.

In 1993, Mr. Moretti founded Medical Insight, Inc., the leader in focused aesthetic market research offering comprehensive data on procedure volume and growth, revenue forecasts and new product introductions. Under Mr. Moretti's leadership, Medical Insight publishes global market studies and forecasts for major industry sectors such as facial injectables, cosmeceuticals, body shaping procedures, skin rejuvenation technologies and home-use aesthetic products. Medical Insight also sponsors executive business forums to address scientific developments and market trends for the investment community.

Mr. Moretti is the founder of *Aesthetic TV*, the first and only one-stop online resource for current, reliable information about cosmetic and anti-aging treatments. *Aesthetic TV* offers expert advice for consumers via interviews with the top physicians in the field, and unprecedented access to the latest beauty-enhancing procedures and products created specifically to help people look and feel their absolute best.

Mr. Moretti is also founder and publisher of *THE Aesthetic Guide*[®] – a digital and print publication from Medical Insight featuring in-depth reports on new products, procedures and trends, reaching over 75,000 physicians, industry executives and investment analyst subscribers globally. Special editions of *THE Aesthetic Guide* address the European and Asian markets.

In 2007, Mr. Moretti debuted *THE Aesthetic Show*[™], the first multidisciplinary annual business to business trade show that brings thousands of the highest profile physicians and medical professionals together in Las Vegas to learn about the newest aesthetic procedures, products and technologies in a dynamic, interactive, educational format. i. Methodology

The Energy-Based Aesthetic Devices mini report was compiled from a wide variety of public and proprietary sources. Information was cross-checked against other data, using Medical Insight's proprietary forecasting models, and synthesized into both qualitative and quantitative analyses and projections.

Public sources that were utilized for this report include:

- articles in trade publications, medical journals and regulatory documents
- articles in consumer magazines and newspapers
- company news releases, website information, patent documents, regulatory data, marketing materials and financial filings
- information from trade associations

Proprietary sources that were utilized include:

- Medical Insight's extensive database of industry and product information
- Medical Insight's physician survey data
- industry analyst reports;
- exclusive interviews with company executives, analysts, researchers, sales representatives, physicians, patients, consultants and other industry experts

Additionally, feedback from Medical Insight product information is continually built back into research products so that reports are updated with the most recent industry and market information on an ongoing basis.

This mini report represents the first edition of Medical Insight's combined Energy-Based Aesthetic Devices report. This report contains the latest industry news and updated market forecasts, which take into account recent technology, product, company, regulatory and other developments, as well as an in-depth analysis of the competitive positions of key players selling to both core and non-core aesthetic practices.

In addition to updated qualitative product, manufacturer and market information, this report also includes forecasts of the 2015 – 2020 period.

Section**1****Executive Summary**

In 2015, the global market for all energy-based aesthetic device platforms and disposables reached over \$1.3 billion (excluding skin tightening and body shaping systems). Through 2020, the market for platforms, excluding disposables, will expand by 6.2% per year to reach almost \$1.9 billion. Disposable sales were \$74 million in 2015, and are expected to rise by a strong 11.7% per year to \$128 million by 2020 as procedure volume expands.

All regions will experience similar gains with North America and Latin America at 6.5% and 6.8% growth per year, respectively. Asia will follow closely behind at 6.1% and Europe will have the slowest growth at 5.4% per year.

In 2015, more than 95,000 energy-based aesthetic treatment systems were installed worldwide. With over 29 million procedures performed during the year, practitioners earned fees of more than \$8 billion. Through 2020, the installed base of systems will rise to more than 102,000 units as physicians increasingly purchase new, clinically validated devices.
