

Halo

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

BTL Intima

The BTL Intima™ provides non-invasive labia remodeling treatment and delivers measurable clinical outcomes with superior levels of comfort and safety. The treatments are safe for patients of all ages and skin types. This is an option for those who desire non-surgical skin tightening and enhancement of sexual satisfaction by non-invasive remodeling of the labia. Practitioners highly endorse its operator ease-of-use, effectiveness, the ability to treat non-invasively and lack of consumables.

Hyabell

The new range of Hyabell® dermal fillers offers a long lasting improvement and a convincing safety profile. The pre-incorporated lidocaine (0.3%) facilitates the injection procedure and reduces pain, thus enhancing patient satisfaction. Hyabell fillers have considerably better visco-elastic properties and softer extrusion forces than other hyaluronic acid dermal fillers available, due to the innovative monophasic particle technology (MPT) production process. The optimized physical properties allow better clinical results.

CELLACTOR SC1 »ultra« and D-ACTOR »ultra« line

The CELLACTOR® SC1 »ultra« and D-ACTOR® »ultra« line offers an Acoustic Wave Therapy (AWT®) system for cosmetic and dermatological disorders such as cellulite, annoying fat pads, striae, scars, wrinkles and lymph congestion. The high energy acoustic waves penetrate the adipose deposits and initiate metabolic activity in the subcutaneous fatty tissue. Radial acoustic waves are applied to the skin's surface, to improve the elasticity of the connective tissue, or to smooth out wrinkles and folds. This non-invasive treatment stimulates the growth of collagen and produces a natural lifting and toning effect.

Ulthera System

Only delivered by the authentic Ulthera® System, Ultherapy® is a non-surgical procedure that uses micro-focused ultrasound to stimulate the body's own natural healing process to non-invasively lift and tighten skin. With over 680,000 treatments to date, this first-of-its kind lifting treatment has received the CE Mark for lifting and sculpting of the dermis of the upper and lower face, neck and décolleté. For indications in your country and full product and safety information, including possible mild side effects, refer to the Ulthera System Instructions for Use.

Fraxis DUO

Fraxis DUO combines CO₂ laser and microneedle RF fractional technologies for optimal results in the treatment of scars and photo-aging. CO₂ fractional enables intense superficial stimulation, while microneedle RF fractional provides more global and deeper stimulation. Such complementary effects could encourage physicians to combine the two technologies to achieve excellent results in the treatment of stretch marks as well.

VECTRA H1

VECTRA H1 is a flexible, high quality 3D imaging solution that can be used in any location for a wide-range of purposes. Face Sculptor software provides aesthetic simulation tools for facial contouring, skin rejuvenation, rhinoplasty, chin augmentation and more. Analytic tools enable measurements of volume and contour plus visualization of texture, vascularity and pigmentation. VECTRA H1 software enables automatic stitching of multiple captures into a single, high resolution 3D image.

SculpSure

SculpSure® is a novel, FDA cleared hyperthermic laser for non-invasive lipolysis of the flanks and abdomen. The 1060 nm wavelength's specific affinity for adipose tissue, coupled with minimal absorption in the dermis, allows SculpSure to treat all skin types in 25 minutes and without downtime. Four one-size-fits-all applicators can be customized into a variety of treatment configurations to meet patients' needs. Following treatment, the body naturally eliminates the disrupted fat cells with results seen in as quickly as six weeks and optimal results usually seen in as few as 12 weeks.

PowerShape2

PowerShape2 is a non-invasive system that combines bipolar radiofrequency (RF), low level laser and vacuum in one platform for safe and convenient treatments. RF delivers thermal energy deep into dermal layer and applies electromagnetic waves to initiate physiological processes. Low level laser increases blood circulation and promotes metabolism, while vacuum massage alleviates minor muscle pain, etc. PowerShape2 provides three different handpieces for the treatment of various regions.

CoolSculpting

CoolSculpting® by ZELTIQ Aesthetics is the number one most requested, non-surgical body sculpting procedure. The groundbreaking CoolSculpting technology uses a patented cooling process to target and eliminate fat cells, without downtime, anesthesia, or pain medication during treatment. Millions of CoolSculpting treatments have been performed worldwide.

TEOSYAL PEN

TEOSYAL® PEN is a motorized, cordless hyaluronic acid injection system. Its homogenous and well-controlled constant flow substantially reduces the pain felt by patients during injection, as well as the intensity of post-injection reactions (swelling, edema, redness). Small (10 cm), light (40 grams), precise, and with remarkable handling, the system allows easy injections in difficult or sensitive areas, or zones requiring high pressure. TEOSYAL PEN will highly improve your own comfort during your injections. Thanks to its ease of use, you only have to concentrate on accurate gel placement and enjoy the smooth and comfortable enhancement of the treated area.

TEOXANE Laboratories: +41 (0) 22 344 96 36
or visit www.teosyalpen.com

Med² Contour Dual

Med² Contour Dual uses a patented handpiece, which carries two efficient ultrasound heads for specific and controlled emission of low frequency ultrasound at a focused depth inside the subcutaneous tissue. Med² Contour Dual acts only on adipose tissue, thanks to the special shape of its handpiece and the inclination of the double ultrasound plates, which center their action on the tissue to treat, thus leaving the surrounding structures undamaged. These features allow safe, efficient and customized treatment, with visible results after the first session.

Cellfina System

The Cellfina™ System is currently the only U.S. FDA cleared and E.U. CE Marked minimally-invasive procedure clinically proven to treat the underlying structural cause of cellulite (fibrous septae) with results that last at least two years. A single 45 to 60 minute treatment with Cellfina will deliver significant improvement in the appearance of cellulite on the buttocks and thighs. For full product and safety information, refer to the Cellfina System Instructions for Use.

MICOOOL-A

MICOOOL-A is a cryo fat reduction device that uses persistent low temperature to reduce subcutaneous fat without damaging overlying skin. Non-invasive selective Cryolipolysis has been reported as a safe and effective treatment modality for the reduction of excess adipose tissue. Different from necrosis liposuction, MICOOOL-A boasts superior cryo fat reduction effects through apoptosis therapy.

miraDry

The miraDry system is the first FDA cleared, non-invasive procedure for permanent reduction of underarm sweat. miraDry is also FDA cleared for permanent reduction of underarm hair of all colors. The miraDry system uses miraWave® Technology – precisely delivered microwave energy, combined with hydroceramic cooling to destroy sweat and odor glands, as well as hair follicles, while protecting the epidermis, upper dermis and sensitive underlying structures. Most patients see results in as little as one fast, safe treatment. miraDry provides one of the highest patient satisfaction ratings of all non-surgical aesthetic procedures.

PROFHILO's

IBSA'S patented BDDE-free thermally stabilized hybrid cooperative complex is made up of 64 mg high and low molecular weight Ultrapure hyaluronic acid (HA) in a 2 mL syringe. Studies have shown optimum results in the malar / submalar areas for remodeling skin laxity using the BAP technique with just five injection points on each side of the face. PROFHILO's high spreadability and cohesiveness have also proven very effective in areas difficult to treat with fillers alone such as the forehead, hands and neck.

PicoWay

PicoWay – now with Resolve – is a dual wavelength (532 nm and 1064 nm) picosecond system with both non-fractional and fractional capabilities, treating a wide-range of pigmented lesions and tattoos. PicoWay's unique mode of action is based on delivering ultrashort picosecond pulses of energy to the tissue. These bursts of energy create a photoacoustic impact, which breaks up the pigmentation into smaller, more easily eliminated particles.

Lifting Threads

Croma-Pharma offers two brands of lifting threads: LFL PDO from Grand Aespio and HAPPY LIFT from Promoitalia. Known for safety and biocompatibility, PDO absorbable threads speed up the process of neocollagenesis. As well, the subsequent stimulation of fibroblasts results in further synthesis of elastin. PDO can achieve the following outcomes: elimination of fine wrinkles; smoothing of deep wrinkles; improvement of skin tone, elasticity and texture; and prevention of tissue sagging, with very short downtimes and no visible scars.

EVA

Enhancer of Vaginal Anatomy (EVA) represents an innovative, effective and advanced medical solution for feminine intimate care with a special focus on vaginal atrophy, laxity of the vaginal introitus, mild stress urinary incontinence (SUI), vulvodynia and vulvar rejuvenation. Thanks to the patented Vaginal Dynamic Quadripolar Radiofrequency™ (VDR™) and Radiofrequency Safety System™ (RSS™) technologies, it allows effective, safe and comfortable vaginal and vulvar treatments. Designed and manufactured in Italy, EVA also features the IoMT (Internet of Medical Things) technology.

Easy Droxy Complex Peel & Neutralizer Versicolor

The Easy Droxy Complex Peel & Neutralizer Versicolor kit provides more than five safe and efficacious treatments. This new system combines A/BHA and a special neutralizer emulsion. Easy Droxy Complex Peel helps rejuvenate and hydrate skin and stimulate regeneration. Neutralizer Versicolor provides visual control of efficacy and uniformity of chemical peel neutralization by a modification of color that limits the risks of non uniform-neutralization and potential burning. Neutralizer Versicolor provides calming and moisturizing effects and is recommended for immediate application after A/BHA solutions and gel peels.

Aliaxin

Aliaxin fillers are based on HYDROLIFT® Action, an approach with the goal of restoring tissue volume, skin tone and hydration and not just filling wrinkles. Each formulation in the Aliaxin filler line has been developed to support specific indications, adapt to the different injection layers and guarantee optimum tissue integration. The most distinctive feature of the Aliaxin gel is its high elasticity, which means an enhanced capacity to adapt to natural facial expressions.

Nordlys

Nordlys combines Selective Waveband Technology® (SWT®) with a powerful short pulse to rival pulse dye lasers. Vascular applicators are available in two sizes to allow for easier treatment of individual lesions. The Nd:YAG has built-in SoftCool™ cooling resulting in almost painless vascular treatments. A new 1550 nm non-ablative fractional laser enables skin resurfacing and treatment of acne scars, surgical scars and striae, all using a silent ergonomic console.

SP Dynamis

This all-in-one, anti-aging laser platform, allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system offers true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard for hair removal, rejuvenation, acne, pigmented and vascular indications. Nd:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large application areas. The SP Dynamis combines popular aesthetic treatments with additional minimally-invasive surgical procedures (laser lipolysis, hyperhidrosis treatment etc.).

Radiesse

Radiesse® is a dermal filler consisting of calcium hydroxylapatite microspheres suspended in an aqueous carboxymethylcellulose gel carrier. Microsphere technology provides lifting and contouring effects with collagen-based volume enhancement, and long-term improvement of skin quality. The rheological properties (high elasticity and viscosity) make it more resistant to external pressure, provide firmer tissue support and help withstand mechanical stress. Radiesse is available with integral lidocaine. Radiesse Lidocaine combines the proven efficacy and safety of Radiesse with extra treatment comfort.

Enerjet

The JVR (Jet Volumetric Remodeling) powered Enerjet™ offers a new category of non-surgical systems for deep remodeling and long lasting skin treatments. JVR technology uses a powerful jet stream (150 m/sec) to create a lateral dispersion of healing compounds deep within the skin. This causes a unique micro-trauma that treats kinetic lifting, facial rejuvenation, acne, C-section and keloid scars, stretch marks, décolleté and necklines. It is appropriate for all skin types year round. No burns, no needles and no thermal damage. Enerjet Solutions deliver superior, immediate and long lasting results.

PerfAction Technologies, Ltd.: +972 50 243 9391 or visit www.enerjet-med.com

MOTUS AX

The new MOTUS AX 755 nm high frequency alex laser system offers totally painless and smokeless hair removal procedures to all types of patients. Utilizing DEKA's proprietary new Moveo Technology, MOTUS AX provides a high comfort procedure with excellent tolerability. MOTUS AX allows for no stress procedures for users also. The easy and full parameter controls (three levels: Soft, Medium, High) and countdown selectable energy levels give physicians the ability to tailor treatments on all patients and for all skin types.

ZLipo

ZLipo is an innovative Cryolipolysis™ system that makes it possible to target fat deposits and reduce them permanently and non-invasively. This method cools fat deposits over a longer period of time to a controlled and safe temperature range. ZLipo convinces with its simple and safe handling. By combining Cryolipolysis and shockwave, Zimmer offers the perfect combination treatment for significantly better fat reduction. Studies have shown that shockwave after Cryolipolysis ensures improved fat loss, stimulates lymphatic drainage and tightens skin.

Thermi250

Thermi250 is a powerful, temperature-controlled radiofrequency system designed to enable maximum versatility for targeting cellulite from eyes to thighs while simultaneously relieving pain, muscle spasms and increasing local circulation.

Thermi, an Almirall Company: +1 866 981 5017 or visit www.thermi.com

Viveve System

The Viveve® System is a non-surgical device that remodels vaginal tissue in a single, 30-minute, in-office procedure. Treatment satisfies patient demand for a painless solution to vaginal laxity and decreased sexual sensation. The system uses patented cryogenically-cooled, monopolar radiofrequency (CCMRF) technology to renew and replenish the collagen scaffolding. Viveve was the first of any energy-based device company to complete a sham-controlled study of an elective vaginal procedure.
