

SP Dynamis

This all-in-one, anti-aging laser platform, allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system offers true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard for hair removal, rejuvenation, acne, pigmented and vascular indications. Nd:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large application areas. The SP Dynamis combines popular aesthetic treatments with additional minimally-invasive surgical procedures (laser lipolysis, hyperhidrosis treatment etc.).

CoolSculpting

CoolSculpting® by ZELTIQ Aesthetics is the number one most requested, non-surgical body sculpting procedure. The groundbreaking CoolSculpting technology uses a patented cooling process to target and eliminate fat cells, without downtime, anesthesia, or pain medication during treatment. Millions of CoolSculpting treatments have been performed worldwide.

Ellansé

Ellansé® is a new generation of collagen stimulators combining the benefits of immediate correction of wrinkles and stimulation of the body's own natural collagen for beautiful, fresh and longer lasting results. Ellansé demonstrates a high safety and efficacy profile, and is available in four distinctive presentations enabling patients to choose how long they would like the results to last (*from one to four years); creating unique solutions in physicians' practices and high patient satisfaction.

*Expected longevity *in vivo* based on extrapolation of clinical data from S and M and accepted PCL degradation behavior.

SmartXide² DOT/RF

The new SmartXide² DOT/RF system offers unsurpassed flexibility and control. Utilizing DEKA's proprietary Pulse Shape Technology (PSD™), a complete array of pulses are selectable upon necessity. Stack technology, plug and play accessories and computer-based protocols complete this state-of-the-art platform. SmartXide² DOT/RF provides less downtime, less intraoperative and post-op pain, and excellent skin tightening with a bi-polar RF scanner, as well as vulvovaginal reshaping.

VISIA 7

The all new 7th Generation VISIA® Complexion Analysis System revolutionizes skincare with improved functionality in a smaller, sleeker design. The VISIA 7 delivers a significantly improved experience for both patient and practitioner with improved workflow, faster capture and enhanced analysis software. The VISIA offers automated skin type classification, refined feature detection and enhanced product recommendations. The 7th Generation VISIA is available in 24 languages.

BTL Vanquish ME

The BTL Vanquish ME™ redefines body contouring with enhanced features for consistent results in trimmed waistlines and thighs. This FDA cleared system provides non-surgical circumferential reduction of the abdominal area. Scientific studies published in peer-reviewed journals validate BTL Vanquish ME's patented technology to induce death of fat cells via apoptosis without disturbing values of serum lipid and liver-related blood tests. This contactless device employs a first-of-its-kind technology using a panel array that creates a high-frequency Selective RF™ energy field.

PicoWay

PicoWay from Syneron Candela, the dual wavelength 532 nm/1064 nm laser with the shortest picosecond pulse duration, is the clear choice for tattoo and pigment removal. PicoWay can treat a broad range of pigmented lesions, as well as tattoo types and colors on any skin type. Proprietary technology creates pure photomechanical interaction to effectively impact tattoo ink and pigmented lesions, without the negative thermal effects of other lasers. New to the PicoWay is the PicoWay Resolve handpieces to target skin at both the epidermal and dermal layers.

ZLipo

As you would expect from a world leader in cryotherapeutic solutions, ZLipo is based on the latest research and technology. High functionality and modern design meet all requirements of an innovative practice. Two holders on the outside of the device are convenient spots for handpiece storage. In addition, a tray on top of the device is perfect for accessories, etc. The sophisticated design makes it easy to reach all areas selected for treatment.

PowerShape2

PowerShape2 is a non-invasive system that combines bipolar radiofrequency (RF), low level laser and vacuum in one platform for safe and convenient treatments. RF delivers thermal energy deep into dermal layer and applies electromagnetic waves to initiate physiological processes. Low level laser increases blood circulation and promotes metabolism, while vacuum massage alleviates minor muscle pain, etc. PowerShape2 provides three different handpieces for the treatment of various regions.

Ultracontour

Ultracontour[®], an advanced ultrasonic device for body contouring, features two focal transducers – one dedicated to fat (UC HIFU), the second for cellulite (U.Lift) – combined with 18 ultrasonic probes for lymphatic drainage (UMD). This system is completely non-invasive and internationally patented with CE medical accreditation. With no consumable transducers and a complete treatment taking only 45 minutes, Ultracontour saves time and money. The fat removal efficiency has been scientifically proven by sonography in compression.

Ulthera System

Only delivered by the authentic Ulthera[®] System, Ultherapy[®] is a non-surgical procedure that uses micro-focused ultrasound to stimulate the body's own natural healing process to non-invasively lift and tighten skin. With over 680,000 treatments to date, this first-of-its kind lifting treatment has received the CE Mark for lifting and sculpting of the dermis of the upper and lower face, neck and décolleté. For indications in your country and full product and safety information, including possible mild side effects, refer to the Ulthera System Instructions for Use.

Fraxis DUO

Fraxis DUO combines CO₂ laser and microneedle RF fractional technologies for optimal results in the treatment of scars and photo-aging. CO₂ fractional enables intense superficial stimulation, while microneedle RF fractional provides more global and deeper stimulation. Such complementary effects could encourage physicians to combine the two technologies to achieve excellent results in the treatment of stretch marks as well.

Juliet

Juliet – the feminine laser concept by Asclepion – is an innovative, minimally invasive laser technology for the treatment of vaginal atrophy and stress urinary incontinence. It provides fast and painless treatments, with no need for anesthesia and minimal downtime. A newly designed handpiece, combined with the latest fractional Erbium:YAG technology, allows for the selective stimulation of sub-mucosal collagen synthesis, leading to an improvement of the tissue and its metabolism restoration with immediate results.

Venus Legacy

Venus Legacy™ featuring two 4D applicators, is a non-surgical system for body contouring, cellulite reduction, stretch mark improvement and skin tightening for the face, neck and body, and is an advancement on the popular first generation Venus Freeze™. This 150 W system combines multipolar RF and Pulsed Magnetic Fields delivered in a fast, homogeneous manner maximizing results while maintaining patient comfort. It's offered through a low risk subscription with a three year warranty and no consumables.

Venus Concept: +1 888 907 0115 or visit www.venusconcept.com

Viveve System

The Viveve® System uses patented cryogenically-cooled, monopolar radiofrequency (CCMRF) technology and is unique in its ability to deliver volumetric heat (90 J/cm²) at depth in order to stimulate robust neocollagenesis. This can be accomplished in just one treatment session and is attributable to the patented technology. Viveve is reportedly the first of any energy-based device company in its category to complete a placebo-controlled study showing statistically significant outcomes and safety.

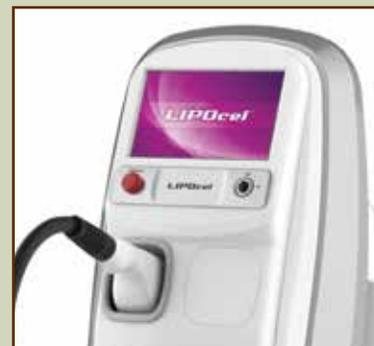

Viveve, Inc.: +1 408 530 1900 or visit www.viveve.com

ThermiRF

ThermiRF® is a platform technology that uses temperature as a clinical endpoint for various minimally and non-invasive aesthetic applications (ThermiTight®, ThermiRase®, ThermiSmooth® Face and ThermiVa®). When combined with external infrared imaging, ThermiRF treatments have been shown to be safe.

Thermi, LLC: +1 866 981 5017 or visit www.thermi.com

LIPOcel

LIPOcel is an advanced technology for body contouring and fat reduction with High-Intensity Focused Ultrasound (HIFU). The LIPOcel procedure guarantees high safety by using a non-invasive method, so as not to damage the peripheral tissues, and transmits energy precisely only to the subcutaneous fat layer.

Enerjet

The JVR (Jet Volumetric Remodeling) powered Enerjet™ offers a new category of non-surgical systems for deep remodeling and long lasting skin treatments. JVR technology uses a powerful jet stream (150 m/sec) to create a lateral dispersion of healing compounds deep within the skin. This causes a unique micro-trauma that treats kinetic lifting, facial rejuvenation, acne, C-section and keloid scars, stretch marks, décolleté and necklines. It is appropriate for all skin types year round. No burns, no needles and no thermal damage. Enerjet Solutions deliver superior, immediate and long lasting results.

PerfAction Technologies, Ltd.: +972 50 243 9391 or visit www.enerjet-med.com

Apriline

Apriline offers three injectable hyaluronic acid (HA) dermal fillers – Normal, Hydro and Forte. Normal is highly versatile, perfect for sensitive skin, under the eyes and lips. Forte yields longer lasting results and provides volume; Hydro uses cutting-edge mesotherapy techniques to restore skin youthfulness and elasticity. These stable gel products have a high level of viscosity, purity and elasticity due to APRI cross-linking technology. This is highly effective in adjusting to the skin's HA deficiency, ensuring long lasting results as the product evenly disperses to smooth wrinkles and fine lines.

Microson Dual

Microson Dual is a portable high intensity focused ultrasound (HIFU) system for facial lifting by producing focal thermal coagulation points at the superficial musculoaponeurotic system (SMAS), deep dermis and subcutaneous adipose tissue. The Microson Dual is a non-invasive, non-surgical ultrasound system providing facial and body lifting effects without causing superficial damages. It incorporates five cartridges and a dual handpiece for convenient treatment.

ZWave^{Pro}

Zimmer MedizinSysteme launched a new system for cellulite treatment with radial shockwave – ZWave^{Pro}. Treatment of cellulite with acoustic radial wave therapy is performed with the transmission of mechanical pressure waves into the tissue. With the new ZWave^{Pro} treatment unit it is possible to perform an effective treatment of connective tissue weakness, stretch marks and cellulite. New expanded application menu enables better and faster skin tightening and body contouring results when combined with ultrasound, soft laser, radiofrequency and cryolipolysis.
