

AccuVein AV400

AccuVein vein visualization technology helps improve aesthetic procedures by providing better vein visibility. The AccuVein AV400, a non-contact, lightweight, portable vein illumination device, provides a visual road map of the patient's vasculature on the surface of the skin. The ability to visualize a patient's unique anatomy facilitates vein avoidance with refined needle placement to minimize bruising during injectable procedures. It also helps in sclerotherapy procedures to identify feeder veins and treat the source.

AccuVein, Inc.: 888-909-8888
or visit www.accuvein.com

Dynamis Pro

This all-in-one, anti-aging laser platform allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system achieves true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard in wrinkle reduction, acne, pigmented and vascular treatments. Nd:YAG and Er:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large treatment areas. The SP Dynamis combines popular aesthetic applications with additional minimally invasive surgical procedures (laser lipolysis, etc.).

BTL Vanquish ME

Further improving on its patented non-invasive Vanquish technology to reduce stubborn fat around the midsection, BTL Aesthetics introduces its newly engineered BTL Vanquish ME (Maximum Energy). This latest iteration takes body contouring to the next level with increased tuning performance, more concentrated thermal energy and less scatter to non-fatty tissue than previously possible. The result is a more homogeneous heating leading to higher overall temperature elevation. A large spot size is designed to treat the whole abdomen from flank to flank during one session.

BTL Industries: 866-285-1656 or visit www.btlaesthetics.com

Halo

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

or visit www.sciton.com

ZWave

The Zimmer ZWave constitutes the latest development in the treatment of cellulite. The ZWave utilizes an electromagnetic generator to create a ballistic force that is transferred to the applicator. Utilizing soft pulse technology to enhance patient comfort, it delivers pulsed radial wave therapy to the treatment area. The ZWave is designed to temporarily reduce the appearance of cellulite. Average or typical patient treatment time is 15-30 minutes.

NANOPORE stylus 1

NANOPORE stylus 1 is the next generation in micro exfoliation technology, promoting skin health through a non-invasive proprietary dermatological device that offers a comprehensive solution for skin rejuvenation, allowing specialists to customize skincare to fit the needs of every patient. First, it removes superficial skin through superior exfoliation, removing dead cells; then, it micro exfoliates the stratum corneum, increasing the absorption of active cosmetic ingredients. Visibly aids in reducing the appearance of fine lines, photo-aging and pores. Also helps improve clarity, firmness and skin tone.

Growth Factor Induced Therapy (GFIT) with AQ Recovery Serum

The AQ Recovery Serum contains our highest concentration of natural growth factors, proteoglycans and glycosaminoglycans. Recovery Serum is designed to enhance the skin's natural process of regeneration by promoting collagen production, supporting healthy circulation and encouraging cellular renewal. The serum is ideal for post-operative care and post-spa procedures, as well as a wrinkle-reduction agent used in conjunction with modalities such as microneedling (AQ GFIT).

AQ Skin Solutions: 949-698-9649 or www.AQskinsolutions.com

Tensage Stem Cell Cream & Eye Cream

Skincare's only stem cell activator, Tensage Stem Cell Cream and Eye Cream, feature CellPro Technology, a unique ingredient containing signaling proteins extracted from the eggs of the *Cryptomphalus aspersa* snail, in an exclusive, patented process. Clinically proven to assist the natural activity of stem cells, Tensage Stem Cell utilizes this new metabolic pathway to replenish skin cells, reinforce skin's integrity and restore radiance, firmness, smoothness and a more youthful appearance.

LightPod Neo

Aerolase 650 ms laser technology offers a new approach for highly effective, long lasting results for treating active acne including problematic conditions such as nodulocystic acne and acne conglobata. This new treatment option offers an efficacious solution for patients who have not been able to use or have not responded to traditional therapies. Aerolase laser technology allows immediate results, is uniquely gentle and sanitary, and offers maximum versatility for both adolescent acne and adult acne.

Aerolase: 914-345-8300 or visit www.aerolase.com

Rejuvn8

Polydioxanone (PDO) has been used for more than 20 years in pediatric cardiac surgery, plastic and orthopedic surgery. PDO threads have a high safety profile, complete absorption, and minimal tissue reaction. They are available in two forms: Smooth and Barbed. Smooth PDO threads support overlying skin and mechanically stimulate neocollagenesis with fibroblast migration and collagen production. Barbed threads stimulate neocollagenesis, lift and secure static sagging skin and are effective for facial and body lifting. Rejuvn8 non-surgical face-lifting techniques incorporate these threads. Our team travels to your office and trains you in a hands-on workshop. Once PDO threads are implemented in your practice, we are available to support you as your PDO experts.

Mediplay

Mediplay provides an ad-free, totally customizable digital signage solution for education and marketing, using the TV in your waiting room. Videos are selected from our library of over 600 multi-specialty topics. Over 150 manufacturer videos are available. Your own videos can be displayed as well, along with custom slides, news feeds, before and after pictures, Facebook and much more. There is also an instant message bar. It's quick to install and easily managed through an online portal.

Mediplay, Inc.: 800-565-1920 or visit www.mediplay.com

Verjú

Verjú is the first green laser to receive FDA market clearance for non-invasive fat loss. The Verjú has proven to do in weeks what others can only claim after months, and it is reportedly the only green body contouring device to be proven through a Level 1, multi-site, placebo controlled, double-blind study. The Verjú utilizes Erchonia's patented line generated low level lasers to target pockets of uneven fat in the thighs, buttocks and lower abdomen. Verjú is a pain free procedure and void of any harmful side effects.

ThermiRF

ThermiRF® is a platform technology that uses temperature as a clinical endpoint for various minimally and non-invasive aesthetic applications (ThermiTight®, ThermiRase®, ThermiSmooth® Face and ThermiVa®). When combined with external infrared imaging, ThermiRF treatments have been shown to be safe.

Thermi, LLC: 866-981-5017 or visit www.thermi.com

oVio360

oVio360 is a first of its kind 360° dynamic imaging system, capable of producing a true and accurate 360° video file with extractable HD stills all at the touch of a button. The files also integrate seamlessly with morphology software. The ability to create multiple side by side real-life before and after comparisons of its enhanced imagery increases patient satisfaction. The oVio360 system creates an environment for consistent lighting and framing of the subject, and its patented centering technology from a top down camera ensures that images are perfectly centered in each video rotation, which takes only 12 seconds. The oVio360 is an unmatched patient experience from beginning to end.
