**Product Profiles**

**Alma Harmony**
Alma Harmony™ combines a full spectrum of aesthetic indications, advanced technologies and excellent clinical results to create complete aesthetic harmony. This system is upgradable and expandable, allowing you to specialize in any aesthetic segment and expand your clinical offerings as your practice grows. Alma Harmony offers powerful treatment solutions for six major indications: skin remodeling, vascular and pigmented lesions, tone and texture, hair removal, acne scars and tattoo removal simultaneously.

**Harmony XL Pro users** are able to serve more skin types in a superior and often virtually painless way.

**Alma Lasers**: (866) 414-ALMA (2562) or visit www.almalasers.com

**Eclipse Skinfinity RF**
Infinitely better skin is at your fingertips. Introduce your clients to the benefits of the Eclipse Skinfinity RF™. This innovative fractional ablative radiofrequency technology is designed for overall skin revitalization. It’s fast, effective, safe for most skin types and can be customized to meet your client’s skincare needs. Ask about scheduling a demonstration with an Eclipse representative to learn how you can incorporate Skinfinity RF’s dramatic results into your practice.

**Eclipse Aesthetics, LLC**: 800-759-6876 or visit www.EclipseAesthetics.com

**M22 ResurFX**
The ResurFX module of M22 is a true, one-pass, fractional non-ablative treatment technology. Unlike other fractional technologies, ResurFX needs only one pass to be effective, saving you time and protecting the patient’s skin. ResurFX uses a 1565 nm fiber laser and a very advanced scanner, which enables you to choose from more than 600 combinations of shape, size and density for optimal treatment results. Even better, your practice wins as there are no consumables or recurring procedure fees.

**Lumenis**: 877-LUMENIS (586-3647) or visit www.aesthetic.lumenis.com

**NANOPORE stylus 1**
NANOPORE stylus 1 is the next generation in micro exfoliation technology, promoting skin health through a non-invasive proprietary dermatological device that offers a comprehensive solution for skin rejuvenation, allowing specialists to customize skincare to fit the needs of every patient. First, it removes superficial skin through superior exfoliation, removing dead cells; then, it micro exfoliates the stratum corneum, increasing the absorption of active cosmetic ingredients. Visibly aids in reducing the appearance of fine lines, photo-aging and pores. Also helps improve clarity, firmness and skin tone.

**Sesderma USA**: 800-796-0996 or visit www.sesdermausa.com or www.medidermausa.com

**Restylane Refyne and Restylane Defyne**
Restylane® Refyne and Restylane® Defyne are approved for the treatment of nasolabial folds in patients over the age of 21. Restylane Refyne is approved for treatment of moderate to severe facial wrinkles and folds and Restylane Defyne is approved for treatment of moderate to severe, deep facial wrinkles and folds. These next-generation HA dermal fillers use XpresHAn Technology™ to help patients maintain natural expression in motion and are proven safe.

**Galderma Laboratories, L.P.**: 817-961-5000 or visit www.restylaneusa.com

**Tensage Stem Cell Cream & Eye Cream**
Skincare’s only stem cell activator, Tensage Stem Cell Cream and Eye Cream, feature CellPro Technology, a unique ingredient containing signaling proteins extracted from the eggs of the Cryptomphalus aspersa snail, in an exclusive, patented process. Clinically proven to assist the natural activity of stem cells, Tensage Stem Cell utilizes this new metabolic pathway to replenish skin cells, reinforce skin’s integrity and restore radiance, firmness, smoothness and a more youthful appearance.

**Biopelle, Inc.**: 866-424-6735 or visit www.biopelle.com
PRODUCT PROFILES

EDGE

The EDGE fractional laser offers a superior solution for rejuvenating and resurfacing skin and tissue. EDGE can be used to treat fine lines and wrinkles, acne and surgical scars, skin pigmentation and discoloration, sun damage, uneven skin texture and atrophy. EDGE offers a selection of fractional spot sizes for optimal energy delivery, along with convenient controls on the handpiece for adjusting pattern shape and size.

**PRODUCT PROFILES**

**Oxygenetix**
Oxygenetix is a breathable foundation / camouflage designed to help heal and conceal a wide variety of skin conditions. Founded in Beverly Hills, Calif., Oxygenetix is used daily on and off the set by Hollywood’s elite. This post-procedure cover-up reduces and eliminates social downtime following aesthetic procedures — the main reason many patients choose not to proceed with laser, peel, needling or dermabrasion treatments — thereby increasing your consultation to procedure conversion rate.

**DefenAge Clinical Power Trio**
Named “one of the biggest breakthroughs in skincare” in 2016, DefenAge’s exclusive ingredient, Age-Repair Defensins®, works via a natural mechanism of action. Clinical studies prove that this revolutionary anti-aging skincare system addresses up to 16 signs of aging in just six weeks. The initial results become visible within the first week of treatment. The technology is patent-pending and can be combined with almost any skincare regimen.

**Crystal Clear Digital Marketing**
Crystal Clear Digital Marketing offers a complete digital marketing system: from search engine optimization, search engine marketing, social media engagement, websites, email marketing, mobile and text marketing, patient relationship management and so much more. Crystal Clear does most of the work so local practices don’t have to.

**SkinPen**
The Bellus Medical SkinPen is a medical grade, state-of-the-art microneedling device designed to improve the appearance of fine lines and wrinkles on the face and body. Bellus Medical is raising the bar on standards for safety, quality and technology with SkinPen. Ask for it by name and know what makes it the best choice for delivering results.

**Laservision’s lightweight F22.P5M02 laser safety eyewear** provides optimal protection during procedures using Nd:YAG lasers. This nearly clear lens offers excellent visibility, allowing for great color recognition while performing laser treatments. The frame is specially designed to fit comfortably over prescription glasses. Dermatologists prefer using the F22.P5M02 when providing laser treatments for hair removal, skin resurfacing, tattoo removal and more.

**Spectrum**
The Spectrum is a multi-platform laser / IPL that features: 810 diode (hair removal), Erbium YAG (skin resurfacing), Q-switched Nd:YAG (tattoo removal), long pulsed YAG (vascular reduction) and IPL (hair removal, vascular and pigmented lesion reduction and acne reduction). The Spectrum can be purchased fully loaded for $54,995.

PRODUCT PROFILES

**Clear + Brilliant pélo™**
Clear + Brilliant pélo™ is a new and innovative laser hair removal technology with a first-in-class mechanism of action which incorporates linear scanning technology to help maximize efficacy, speed and patient comfort, all with just one handpiece. This new device has the largest spot size and scan area within the class of diode hair removal lasers, allowing for full body treatments amongst all skin and hair types.

**Solta Medical, a division of Valeant Pharmaceuticals North America LLC:**
510-786-6946 or visit www.solta.com

**AirGent2.0**
AirGent2.0 is a needle-free injection system designed for the administration of various medicines to the skin by a high velocity jet. Various clinical publications show extraordinary, effective results with treatment of skin dermal remodeling on face, hands and neck1, treatment of neck wrinkles2, treatment of acne scars3 and more.

**BTL Vanquish ME**
Further improving on its patented non-invasive Vanquish technology to reduce stubborn fat around the midsection, BTL Aesthetics introduces its newly engineered BTL Vanquish ME (Maximum Energy). This latest iteration takes body contouring to the next level with increased tuning performance, more concentrated thermal energy and less scatter to non-fatty tissue than previously possible. The result is a more homogeneous heating leading to higher overall temperature elevation. A large spot size is designed to treat the whole abdomen from flank to flank during one session.

**BTL Industries:** 866-285-1656 or visit www.btl-aesthetics.com

**Bellafill®**
Bellafill® is the only dermal filler FDA approved for the correction of nasolabial folds and moderate to severe, atrophic, distensible facial acne scars on the cheek in patients over the age of 21 years. This smooth, collagen-based filler is comprised of 80% bovine collagen gel and 20% polymethylmethacrylate (PMMA) microspheres. The collagen immediately volumizes smile lines or atrophic acne scars, lifting them to the level of surrounding skin. The PMMA microspheres form a matrix that supports production of endogenous collagen, which replaces the injected collagen over time.

**Suneva Medical:** 888-278-3345 or visit www.sunevamedical.com

Bodystudio ATBM with Aesthetics Software

The revolutionary Bodystudio ATBM for automated total body mapping keeps getting better and better. Now the additional FotoFinder aesthetics software allows for consistent before and after documentation of aesthetic treatments. Within minutes your staff can map an entire patient who comes in for total body mapping and then take brilliant, consistent before and afters of cosmetic treatments. The perfect all-in-one photo system for your office that covers all your imaging needs.

FotoFinder Systems: 888-501-0805 or visit www.fotofinder-systems.com

Discovery Pico Series

The Discovery Pico Series are powerful picosecond devices, featuring QuattroPulse™ technology that allows the devices to be operated in four separate emission modes: Picosecond, Q-switched, OptiPulse™ and Photo-Thermal pulse durations, giving you even more treatment options, efficacy and flexibility. The addition of the 694 nm true Ruby laser in the Plus model makes this the premier picosecond laser for skin treatments and tattoo removal. Discover the Quanta difference that is transforming aesthetics.

Quanta Aesthetic Lasers: 866-353-5115 or visit www.quantausa.com

ThermiRF

ThermiRF® is a platform technology that uses temperature as a clinical endpoint for various minimally and non-invasive aesthetic applications (ThermiTight®, ThermiRase®, ThermiSmooth® Face and ThermiVa®). When combined with external infrared imaging, ThermiRF applications have been shown to be safe.

Thermi, LLC: 866-981-5017 or visit www.thermi.com

CLINICIANS COMPLEX Under Eye Repair

This clinical strength product is formulated to instantly reduce the appearance of dark circles and puffy tissue under the eyes as well as promote long-term healing of the main causes of these problems. Light diffusing ingredients instantly modify visible dark circles and puffy eye tissue by creating invisible particles of mineral pigment that reflect and emit light, making imperfections temporarily disappear. Long-term healing is facilitated by several breakthrough active ingredients that address the main causes of these problems. Hesperidin methyl chalcone is a flavonoid derived from citrus that helps eliminate the blood originated pigments responsible for the dark circle color under the eye area.

Viveve System

The Viveve® System is a non-ablative device that remodels soft tissue in a single, 30-minute procedure. This system uses patented cryogen-cooled, monopolar radiofrequency (CMRF) technology to create a reverse thermal gradient that penetrates deep tissue while protecting surface layers.

Halo

Halo is the world’s first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.
Dynamis Pro
This all-in-one, anti-aging laser platform allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system achieves true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard in wrinkle reduction, acne, pigmented and vascular treatments. Nd:YAG and Er:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large treatment areas. The SP Dynamis combines popular aesthetic applications with additional minimally invasive surgical procedures (laser lipolysis, etc.).

Collagen P.I.N.
Collagen P.I.N. is a new innovation in advanced collagen induction therapy that introduces a controlled wound into the skin triggering the release of natural growth factors, new collagen and elastin. Automated microneedling causes less damage to the epidermis than dermal rolling, laser or other ablative treatments. Utilizing Collagen P.I.N. with our Induction Therapies clean, clinical products (specifically designed for use post microneedling) minimizes complications and provides quicker healing and longer lasting results. More needles. More power. More depth. More collagen.

ZWave
The Zimmer ZWave constitutes the latest development in the treatment of cellulite. The ZWave utilizes an electromagnetic generator to create a ballistic force that is transferred to the applicator. Utilizing soft pulse technology to enhance patient comfort, it delivers pulsed radial wave therapy to the treatment area. The ZWave is designed to temporarily reduce the appearance of cellulite. Average or typical patient treatment time is 15-20 minutes.

Growth Factor Induced Therapy (GFIT) with AQ Recovery Serum
The AQ Recovery Serum contains our highest concentration of natural growth factors, proteoglycans and glycosaminoglycans. Recovery Serum is designed to enhance the skin’s natural process of regeneration by promoting collagen production, supporting healthy circulation and encouraging cellular renewal. The serum is ideal for post-operative care and post-spa procedures, as well as a wrinkle-reduction agent used in conjunction with modalities such as microneedling (AQ GFIT).

VECTRA H1
VECTRA H1 is a flexible, high quality 3D imaging solution that can be used in any location for a wide-range of purposes. Face Sculptor software provides aesthetic simulation tools for facial contouring, skin rejuvenation, rhinoplasty, chin augmentation and more. Analytic tools enable measurements of volume and contour plus visualization of texture, vascularity and pigmentation. VECTRA H1 software enables automatic stitching of multiple captures into a single, high resolution 3D image.

**Product Profiles**

**Phoenix CO2**
The Phoenix CO2 is priced under $35,000 and can be used to remove uneven pigmentation and reduce fine lines and coarse wrinkles. Depending on which handpiece is attached, the Phoenix-15 can cut, coagulate and vaporize soft tissue. The Phoenix CO2 features one of the largest scan patterns in the industry and can resurface both hands in under two minutes.

**Rohrer Aesthetics:** 205-940-2200 or visit www.rohreraesthetics.com

---

**PicoWay**
The PicoWay picosecond workstation has three wavelengths, 532 nm, 785 nm and 1064 nm for comprehensive removal of multicolor tattoos on the widest variety of skin types. With the shortest pulse duration (300 ps – 450 ps), the PicoWay can disrupt the smallest pigment, thus clearing tattoos faster. The addition of fractional dual wavelength handpieces adds anti-aging, pigmentation and acne scar treatment options with almost zero downtime.

**Syneron Candela:** 866-259-6661 or visit www.syneron-candela.com

---

**Eclipse PRP**
Eclipse PRP® is a proprietary system that is based on blood separation according to density using a proprietary separation gel. The PRP platform is available with an 11 mL PRP collection tube or 22 mL high concentration PRP collection tube. This system allows for the preparation of pure Platelet-Rich Plasma (PRP) with optimal platelet concentrations and cellular content. Virtually all red blood cells (RBC) are eliminated from PRP and the concentration of pro-inflammatory granulocytes (GRs) is highly reduced. The entire preparation process only takes up to 20 minutes. 510(k) number BK110035.
