Information in this study has been obtained by Medical Insight, Inc., from sources believed to be reliable. While Medical Insight believes the data provided herein to be accurate, no expressed or implied guarantees regarding accuracy or adequacy are made. Product and corporate data can change very quickly and without notice and Medical Insight continually updates its research products. Because of this, certain figures in Medical Insight reports may differ from corresponding figures in earlier reports, even if those reports were issued relatively recently. Furthermore, current economic conditions are contributing to a highly volatile market, in which actual results often diverge significantly from estimates developed by manufacturers, analysts and others, resulting in a revision of projections. Therefore, while Medical Insight will provide an explanation of figures in any of its reports, only the most recent reports contain Medical Insight's latest estimates.

This study is not intended as a substitute for proper due diligence. Although an attempt has been made to provide thorough coverage of the subject matter of this report, no guarantees regarding completeness or thoroughness are made. Medical Insight is not responsible for any errors, omissions, or results obtained from use of information provided herein.

Any use which a reader makes of this report or any reliance on or decisions to be made based on it are the sole responsibility of such reader. Medical Insight accepts no responsibility for damages, if any, suffered by any reader as a result of decisions or actions taken based on this study.

# M.I.I Professional Biography

Michael Moretti  
President  
Medical Insight, Inc.

Michael Moretti has served as a medical industry analyst and strategic advisor for more than 25 years. As an industry consultant, Mr. Moretti specializes in strategic business development projects and high-growth, emerging market segments. He provides custom reports and confidential market studies for a variety of clients, including global medical and pharmaceutical companies.

In 1993, Mr. Moretti founded Medical Insight, Inc., the leader in focused aesthetic market research offering comprehensive data on procedure volume and growth, revenue forecasts and new product introductions. Under Mr. Moretti's leadership, Medical Insight publishes global market studies and forecasts for major industry sectors such as facial injectables, cosmeceuticals, body shaping procedures, skin rejuvenation technologies and home-use aesthetic products. Medical Insight also sponsors executive business forums to address scientific developments and market trends for the investment community.

Mr. Moretti is the founder of *Aesthetic TV*, the first and only one-stop online resource for current, reliable information about cosmetic and anti-aging treatments. *Aesthetic TV* offers expert advice for consumers via interviews with the top physicians in the field, and unprecedented access to the latest beauty-enhancing procedures and products created specifically to help people look and feel their absolute best.

Mr. Moretti is also founder and publisher of *THE Aesthetic Guide*<sup>®</sup> – a digital and print publication from Medical Insight featuring in-depth reports on new products, procedures and trends, reaching over 75,000 physicians, industry executives and investment analyst subscribers globally. Special editions of *THE Aesthetic Guide* address the European and Asian markets.

In 2007, Mr. Moretti debuted *THE Aesthetic Show*<sup>™</sup>, the first multidisciplinary annual business to business trade show that brings thousands of the highest profile physicians and medical professionals together in Las Vegas to learn about the newest aesthetic procedures, products and technologies in a dynamic, interactive, educational format. ## i. Methodology

Body shaping and skin tightening data was compiled from a wide variety of public and proprietary sources. Information was cross-checked against other data, using Medical Insight's proprietary forecasting models, and synthesized into both qualitative and quantitative analyses and projections.

Public sources that were utilized include:

- articles in trade publications, medical journals and regulatory documents;
- articles in consumer magazines and newspapers;
- company news releases, website information, patent documents, regulatory data, marketing materials and financial filings;
- information from trade associations

Proprietary sources that were utilized include:

- Medical Insight's extensive database of industry and product information;
- Medical Insight's physician survey data;
- industry analyst reports;
- exclusive interviews with, and feedback from, company executives, analysts, researchers, sales representatives, physicians, patients, consultants and other industry experts

## ii. New in July 2017

This mini report represents the tenth edition of Medical Insight, Inc.'s combined Body Shaping and Skin Tightening report. Since many skin tightening devices are used for body shaping and vice versa, this report includes both types of systems.

Like the prior reports, this current report contains the latest industry news and updated market forecasts, which take into account recent technology, product, company, regulatory and other developments, as well as an in-depth analysis of the competitive positions of key players selling to both core and non-core aesthetic practices.

In addition to updated qualitative and quantitative product, manufacturer and market information, this report also includes:

- Extension of forecasts from the 2015 – 2020 period to the 2016 – 2021 period;
- quotes from analysts, industry thought leaders and top executives;

**Section****1**

# Executive Summary

In 2016, the global market for all body shaping and skin tightening device platforms and disposables reached \$996 million. Through 2021, the overall market will expand by 14.5% per year, driven by rising consumer interest in these procedures.

The global market for all device platforms reached \$697 million in 2016. Through 2021, the market for platforms, excluding disposables, will expand by 12.1% per year, on average. This growth is lower than the 13.8% CAGR predicted in our previous version of this report, and is due to uncertainties surrounding the global economy. However, this double digit growth rate reflects the shifting consumer interest in non-invasive body sculpting compared to other, more established energy-based device markets. Disposable sales of \$299 million in 2016 are expected to rise by a strong 19.5% per year as procedure volume expands.

On a regional basis, North America is the largest single market for body shaping and skin tightening devices, with platform sales of about \$405 million in 2016. Annual growth through 2021 of 11.4% will result from continued market penetration of newer technologies. The strongly growing Asian and Latin American countries will experience solid gains at 16% and 14.1% per year, respectively. Europe will experience annual growth of 9.8%.

ZELTIQ led the market in total dollar sales in 2016 with close to 36% of the market. The company has established a very strong position with its CoolSculpting brand and ongoing technology enhancements.

In 2016, more than 46,000 skin tightening and body shaping systems were installed worldwide. With over 8 million procedures performed during the year, practitioners earned fees of more than \$4.3 billion. Through 2021, the installed base of systems will rise to more than 58,000 units as physicians who did not offer body shaping increasingly purchase new, clinically validated devices.
