

**Viveve System**

Viveve Medical, Inc. is committed to advancing solutions to improve women’s overall well-being. Backed by randomized, placebo-controlled data, their flagship product, the Viveve® System, uses their patented, cryogen-cooled, monopolar radiofrequency (CMRF) to remodel vaginal tissue in a single, 30-minute session – satisfying patient demand for a painless solution for vaginal laxity. Vaginal laxity is associated with decreased sexual sensation and urinary incontinence.

**CoolSculpting**

CoolSculpting® by ZELTIQ Aesthetics is the number one most requested, non-surgical body sculpting procedure. The groundbreaking CoolSculpting technology uses a patented cooling process to target and eliminate fat cells, without downtime, anesthesia, or pain medication during treatment. Millions of CoolSculpting treatments have been performed worldwide.

**Ultracontour**

Ultracontour®, an advanced ultrasonic device for body contouring, features two focal transducers – one dedicated to fat (UC HIFU), the second for cellulite (U.Lift) – combined with 18 ultrasonic probes for lymphatic drainage (UMD). This system is completely non-invasive and internationally patented with CE medical accreditation. With no consumable transducers and a complete treatment taking only 45 minutes, Ultracontour saves time and money. The fat removal efficiency has been scientifically proven by sonography in compression.

**PowerShape2**

PowerShape2 is a non-invasive system that combines bipolar radiofrequency (RF), low level laser and vacuum in one platform for safe and convenient treatments. RF delivers thermal energy deep into the dermal layer and applies electromagnetic waves to initiate physiological processes. Low level laser increases blood circulation and promotes metabolism, while vacuum massage alleviates minor muscle pain, etc. PowerShape2 provides three different handpieces for the treatment of various regions.

**ThermiRF**

ThermiRF® is a platform technology that uses temperature as a clinical endpoint for various minimally and non-invasive aesthetic applications (ThermiTight®, ThermiRase®, ThermiSmooth® Face and ThermiVa®). When combined with external infrared imaging, ThermiRF applications have been shown to be safe.

**Body By BTL**

Founded in 1993, BTL has become a major manufacturer of medical and aesthetic equipment, offering advanced non-invasive solutions for body shaping, skin tightening and other medical aesthetic treatments. With an unlimited number of product combinations, the new Body By BTL program takes the aesthetic market to the next level. BTL Vanquish ME, BTL Exilis, BTL X-Wave and BTL Exilite treat the body from head to toe with outstanding results and no costly consumables. The range of clinically proven devices offers a safe and non-invasive solution without any downtime.

**Aquamid**

Aquamid® Reconstruction is a non-absorbable hydrophilic gel consisting of 97.5% water and 2.5% cross-linked polyacrylamide. It is designed for soft tissue augmentation for aesthetic and reconstructive purposes and acts by adding volume to soft tissue. Aquamid gives an immediate, natural look and feel, and integrates completely into subcutaneous tissue. It does not degrade over time, and the aesthetic results will remain for years. The efficacy and safety of Aquamid have been documented in several international clinical studies.

**ZLipo**

As you would expect from a world leader in cryotherapeutic solutions, ZLipo is based on the latest research and technology. High functionality and modern design meet all requirements of an innovative practice. Two holders on the outside of the device are convenient spots for handpiece storage. In addition, a tray on top of the device is perfect for accessories, etc. The sophisticated design makes it easy to reach all areas selected for treatment.

**Juliet**

Juliet – the feminine laser concept by Asclepion – is an innovative, minimally invasive laser technology for the treatment of vaginal atrophy and stress urinary incontinence. It provides fast and painless treatments, with no need for anesthesia and minimal downtime. A newly designed handpiece, combined with the latest fractional Erbium:YAG technology, allows for the selective stimulation of sub-mucosal collagen synthesis, leading to an improvement of the tissue and its metabolism restoration with immediate results.

**Double Gold**

Double Gold is the newest edition to Hironic's Double Series, delivering non-invasive HIFU energy to different skin layers from 1.5 mm to 4.5 mm under the epidermis to effectively lift skin and remodel collagen. The Double Series has international brand recognition with over 2,000 systems installed worldwide. Double Gold is safe, effective and KFDA approved. Treatment time is significantly shortened compared with Double-S. With upgraded, user-friendly functions, continuous shot mode and a shot interval control system, Double Gold improves physician and patient satisfaction. Double technology holds 19 patents and was named a world-class product by the Department of Commerce, Industry of Korea.

**VISIA 7**

The all new 7th Generation VISIA® Complexion Analysis System revolutionizes skincare with improved functionality in a smaller, sleeker design. The VISIA 7 delivers a significantly improved experience for both patient and practitioner with improved workflow, faster capture and enhanced analysis software. The VISIA offers automated skin type classification, refined feature detection and enhanced product recommendations. The 7th Generation VISIA is available in 24 languages.

**AGELine**

Apriline® Mesotherapy products: SKINLine, AGELine and HAIRLine, contain patented CHAC Technology, which integrates and distributes specific bioactive components into the HA macro chains for lasting results, higher bioavailability and targeted delivery of ingredients. AGELine features Acetyl Tetrapeptide-5, Acetyl Hexapeptide-3, Palmitoyl Pentapeptide-4, various amino acids and vitamins, for anti-aging protection, improvement in skin elasticity and collagen production, smoothing out wrinkles, and enhancing lymphatic flow. According to a clinical study conducted by GREDECO Laboratory, patients experienced 15.6% skin re-dermatization and 46.9% radiance improvement in under 90 days.

**Fraxis DUO**

Fraxis DUO combines CO<sub>2</sub> laser and microneedle RF fractional technologies for optimal results in the treatment of scars and photo-aging. CO<sub>2</sub> fractional enables intense superficial stimulation, while microneedle RF fractional provides more global and deeper stimulation. Such complementary effects could encourage physicians to combine the two technologies to achieve excellent results in the treatment of stretch marks as well.

**EnerJet and EnerJet2.0**

Jet Volumetric Remodeling (JVR) technology simultaneously delivers kinetic energy and a healing compound with minimum epidermal damage, enabling ideal compound spread and a controlled deep micro trauma for immediate hydration, volume and long lasting skin remodeling. This single, innovative, non-thermal and non-surgical solution is suitable for all skin types and all areas of the body. EnerJet and EnerJet2.0 are ideal for kinetic non-surgical face-lifts, scar repair and dermal thickening. EnerJet solutions are proven to deliver superior, immediate and lasting clinical results, and are appropriate for all skin types year round.

**Halo**

Halo is a Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

**Ulthera System**

The Ulthera® System delivers Ultherapy® Treatment – a non-surgical procedure using micro-focused ultrasound to stimulate the body's natural healing process to non-invasively lift and tighten skin. Ultrasound technology enables physicians to see and treat the deepest support layers of the skin without cutting the surface of the skin. The system's unique DeepSEE™ imaging ensures proper coupling of the transducer to the skin and confirms appropriate depth of treatment to avoid bone and vessels. Ultherapy has received the EU CE Mark for lifting and sculpting the dermis of the upper and lower face, neck and décolleté, and is the only U.S. FDA cleared non-invasive lift. In just one 60-90 minute treatment results appear naturally and gradually over the course of 2-3 months.

**SP Dynamis**

This all-in-one, anti-aging laser platform, allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system offers true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard for hair removal, rejuvenation, acne, pigmented and vascular indications. Nd:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large application areas. The SP Dynamis combines popular aesthetic treatments with additional minimally-invasive surgical procedures (laser lipolysis, hyperhidrosis treatment etc.).
