

Halo

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

BTL Vanquish ME

Further improving on its patented non-invasive Vanquish technology to reduce stubborn fat around the midsection, BTL Aesthetics introduces its newly engineered BTL Vanquish ME (Maximum Energy). This latest iteration takes body contouring to the next level with increased tuning performance, more concentrated thermal energy and less scatter to non-fatty tissue than previously possible. The result is a more homogeneous heating leading to higher overall temperature elevation. A large spot size is designed to treat the whole abdomen from flank to flank during one session.

Discovery PICO Series

The Discovery PICO Series lasers deliver both picosecond and nanosecond pulses with an industry-leading 1.8 GW of peak power. QuattroPulse™ technology offers four separate emission modes: picosecond, Q-switched, OptiPulse™ and photo-thermal pulse durations, giving you even more treatment options, efficacy and flexibility. The addition of the 694 nm true Ruby laser in the Plus model makes this a premier picosecond laser for skin treatments and tattoo removal. Discover the Quanta difference that is transforming aesthetics.

ProGen PRP

Many platelet-rich plasma (PRP) systems are available on the market today, but not all are created equal. The Bellus Medical ProGen™ PRP system is recognized as the most flexible, validated kit in the marketplace that can deliver 2x and 5.1x PRP and validated 5x concentration of growth factors. Its flexibility, combined with single spin options, a reduction in procedure time and consistently repeatable results, offers the best value in the PRP market. This adaptable system grows with your practice as your demands for validated concentration levels and need for larger quantities of PRP evolves. Learn how you can optimize your PRP business with the Bellus Medical ProGen PRP system.

Dynamis Pro

This all-in-one, anti-aging laser platform allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system achieves true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard in wrinkle reduction, acne, pigmented and vascular treatments. Nd:YAG and Er:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large treatment areas. The SP Dynamis combines popular aesthetic applications with additional minimally invasive surgical procedures (laser lipolysis, etc.).

Oxygenetix

Oxygenetix is a breathable foundation / camouflage designed to help heal and conceal a wide variety of skin conditions. Founded in Beverly Hills, Calif., Oxygenetix is used daily on and off the set by Hollywood's elite. This post-procedure cover-up reduces and eliminates social downtime following aesthetic procedures – the main reason many patients choose not to proceed with laser, peel, needling or dermabrasion treatments – thereby increasing your consultation to procedure conversion rate.

Collagen P.I.N.

Collagen P.I.N. is a new innovation in advanced collagen induction therapy that introduces a controlled wound into the skin triggering the release of natural growth factors, new collagen and elastin. Automated microneedling causes less damage to the epidermis than dermal rolling, laser or other ablative treatments. Utilizing Collagen P.I.N. with our Induction Therapies clean, clinical products (specifically designed for use post microneedling) minimizes complications and provides quicker healing and longer lasting results. More needles. More power. More depth. More collagen.

DefenAge Clinical Power Trio

A comprehensive multicenter clinical study shows that DefenAge's core skincare regimen (exclusive ingredient Age-Repair Defensins®) addresses visible signs of skin aging on a global scale (randomized, placebo/vehicle-controlled, double-blinded study; 44 participants). This wide-ranging visible improvement of aging skin was confirmed by multiple advanced methods of evaluation of skin conditions including histopathology and high-resolution skin ultrasound. The study was performed by Amy Forman Taub, M.D. (PI), Vivian Bucay, M.D. and Gregory Keller, M.D.

M22 ResurFX

The ResurFX module of M22 is a true, one-pass, fractional non-ablative treatment technology. Unlike other fractional technologies, ResurFX needs only one pass to be effective, saving you time and protecting the patient's skin. ResurFX uses a 1565 nm fiber laser and a very advanced scanner, which enables you to choose from more than 600 combinations of shape, size and density for optimal treatment results. Even better, your practice wins as there are no consumables or recurring procedure fees.
