

**Juliet**

Juliet – the feminine laser concept by Asclepion – is an innovative, minimally invasive laser technology for the treatment of vaginal atrophy and stress urinary incontinence. It provides fast and painless treatments, with no need for anesthesia and minimal downtime. A newly designed handpiece, combined with the latest fractional Erbium:YAG technology, allows for the selective stimulation of sub-mucosal collagen synthesis, leading to an improvement of the tissue and its metabolism restoration with immediate results.

**ZLipo**

As you would expect from a world leader in cryotherapeutic solutions, ZLipo is based on the latest research and technology. High functionality and modern design meet all requirements of an innovative practice. Two holders on the outside of the device are convenient spots for handpiece storage. In addition, a tray on top of the device is perfect for accessories, etc. The sophisticated design makes it easy to reach all areas selected for treatment.

**HydraFacial**

HydraFacial™ is the only hydradermabrasion procedure that uses patented technology to cleanse, extract and hydrate. Packed with vital nutrients like antioxidants, peptides and hyaluronic acid, the super serums create an instantly gratifying glow and it is the unique serum delivery that puts HydraFacial into a category of its own.

**Enerjet2.0**

The Enerjet2.0™ further advances the category of non-surgical therapies for deep remodeling and long lasting skin treatments, together with supreme needle-free intradermal compound delivery. The synergy between these two effects sets in motion a cascade healing process, resulting in natural healing and hydrating that generates production of new collagen, ultimately volumizing, hydrating and remodeling collagen in one short and simple treatment. This single, innovative, non-thermal and non-surgical solution is suitable for all skin types and all areas of the body.

**Ulthera System**

The Ulthera® System delivers Ultherapy® Treatment – a non-surgical procedure using micro-focused ultrasound to stimulate the body's natural healing process to non-invasively lift and tighten skin. Ultrasound technology enables physicians to see and treat the deepest support layers of the skin without cutting the surface of the skin. The system's unique DeepSEE™ imaging ensures proper coupling of the transducer to the skin and confirms appropriate depth of treatment to avoid bone and vessels. Ultherapy has received the EU CE Mark for lifting and sculpting the dermis of the upper and lower face, neck and décolleté, and is the only U.S. FDA cleared non-invasive lift. In just one 60-90 minute treatment results appear naturally and gradually over the course of 2-3 months.

**Body By BTL**

Founded in 1993, BTL has become a major manufacturer of medical and aesthetic equipment, offering advanced non-invasive solutions for body shaping, skin tightening and other medical aesthetic treatments. With an unlimited number of product combinations, the new Body By BTL program takes the aesthetic market to the next level. BTL Vanquish ME, BTL Exilis, BTL X-Wave and BTL Exilite treat the body from head to toe with outstanding results and no costly consumables. The range of clinically proven devices offers a safe and non-invasive solution without any downtime.

**BTL Industries: +44 01782 579 060 or visit [www.btlaesthetics.com](http://www.btlaesthetics.com)**

**Viveve System**

Viveve Medical, Inc. is committed to advancing solutions to improve women's overall well-being. Backed by randomized, placebo-controlled data, their flagship product, the Viveve® System, uses patented, cryogen-cooled, monopolar radiofrequency (CMRF) to remodel vaginal tissue in a single, 30-minute session – satisfying patient demand for a painless solution for vaginal laxity. Vaginal laxity is associated with decreased sexual sensation and urinary incontinence.

**MOTUS AX**

The new MOTUS AX 755 nm high frequency alex laser system offers totally painless and smokeless hair removal procedures to all types of patients. Utilizing DEKA's proprietary new Moveo Technology, MOTUS AX provides a high comfort procedure with excellent tolerability. MOTUS AX allows for no stress procedures for users also. The easy and full parameter controls (three levels: Soft, Medium, High) and countdown selectable energy levels give physicians the ability to tailor treatments on all patients and for all skin types.

**Ultracontour**

Ultracontour®, an advanced ultrasonic device for body contouring, features two focal transducers – one dedicated to fat (UC HIFU), the second for cellulite (U.Lift) – combined with 18 ultrasonic probes for lymphatic drainage (UMD). This system is completely non-invasive and internationally patented with CE medical accreditation. With no consumable transducers and a complete treatment taking only 45 minutes, Ultracontour saves time and money. The fat removal efficiency has been scientifically proven by sonography in compression.

**ThermiRF**

ThermiRF® is a platform technology that combines temperature control with advanced real-time temperature monitoring to enable various minimally and non-invasive aesthetic applications. The temperature control capability of ThermiRF allows physicians to customize the selected therapeutic endpoint for each patient.

**Thermi, an Almirall Company: +1 866 981 5017 or visit [www.thermi.com](http://www.thermi.com)**

**Aquamid**

Aquamid® Reconstruction is a non-absorbable hydrophilic gel consisting of 97.5% water and 2.5% cross-linked polyacrylamide. It is designed for soft tissue augmentation for aesthetic and reconstructive purposes and acts by adding volume to soft tissue. Aquamid gives an immediate, natural look and feel, and integrates completely into subcutaneous tissue. It does not degrade over time, and the aesthetic results will remain for years. The efficacy and safety of Aquamid have been documented in several international clinical studies.

**Halo**

Halo is a Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

or visit [www.sciton.com](http://www.sciton.com)**

**enCurve**

The enCurve is an easy and comfortable way to reduce fat through apoptosis-inducing radiofrequency. Working via controlled delivery of energy deep into the adipose tissue, enCurve utilizes a specialized frequency (27.12 MHz) combined with the ideal 300 Watts of power to selectively target and heat adipocytes to the optimal temperature causing denaturation of cells, leading to death of adipocytes.

**Lutronic: +82 31 908 3440 or visit [www.international.lutronic.com/encurve](http://www.international.lutronic.com/encurve)**

**PowerShape2**

PowerShape2 is a non-invasive system that combines bipolar radiofrequency (RF), low level laser and vacuum in one platform for safe and convenient treatments. RF delivers thermal energy deep into the dermal layer and applies electromagnetic waves to initiate physiological processes. Low level laser increases blood circulation and boosts metabolism, while vacuum massage alleviates minor muscle pain, etc. PowerShape2 provides three different handpieces for the treatment of various regions.

**SP Dynamis**

This all-in-one, anti-aging laser platform, allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system offers true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard for hair removal, rejuvenation, acne, pigmented and vascular indications. Nd:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large application areas. The SP Dynamis combines popular aesthetic treatments with additional minimally-invasive surgical procedures (laser lipolysis, hyperhidrosis treatment etc.).

**PicoWay**

PicoWay, the dual wavelength 532 nm/1064 nm laser with the shortest picosecond pulse duration, is the clear choice for tattoo and pigment removal. PicoWay can treat a broad range of pigmented lesions, as well as tattoo types and colors on any skin type. Proprietary technology effectively impacts tattoo ink and pigmented lesions, without the negative thermal effects of other lasers. PicoWay Resolve handpieces target skin at both the epidermal and dermal layers. As the latest addition to the PicoWay system, the 785 nm wavelength enables optimal treatment for blue and green inks, making PicoWay the first 785 nm picosecond-domain laser.

**mesoéclat**

mesoéclat is the first complete anti-aging method with instant, lasting action. Treatment combines professional sessions in office and maintenance phases at home. With deeper penetration of the active ingredients at each session, the results accumulate over time and the benefits become more visible. mesoéclat helps promote a renewal of the upper layers of the epidermis, restores the radiance to the skin and hydrates deep down into the dermis. As a result, it eliminates wrinkles and expression lines and the skin is softer, smoother and more even.

**BTL Vanquish ME**

The BTL Vanquish ME™ redefines body contouring with enhanced features for consistent results in trimmed waistlines and thighs. This FDA cleared system provides non-surgical circumferential reduction of the abdominal area. Scientific studies published in peer-reviewed journals validate BTL Vanquish ME's patented technology to induce death of fat cells via apoptosis without disturbing values of serum lipid and liver-related blood tests. This contactless device employs a first-of-its-kind technology using a panel array that creates a high-frequency Selective RF™ energy field.
