

**Halo**

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

**Exilis Ultra 360**

The Exilis Ultra 360 represents one of the world's most advanced technologies for body contouring, skin tightening, facial rejuvenation and intimate health wellness. Its two applicators and various exchangeable tips enable the treatment of more than 20 body areas – making the system arguably the most versatile platform on the market. With its unique combination of monopolar radiofrequency, ultrasound and adjustable cooling, the system can selectively focus energy to various tissue layers as required. It effectively stimulates the growth of collagen and elastin, enhancing the power of skin to lift and tighten all over the body.

**Doubo Gold**

Doubo Gold is a new model of Hironic's Doubo series, delivering HIFU energy to different skin layers from 1.5 mm to 4.5 mm under the epidermis to non-invasively and effectively lift skin and remodel the collagen layer. The Doubo series is internationally recognized with over 1,700 systems installed worldwide. Doubo Gold is approved by the KFDA. Treatment time is shortened by two times compared to Doubo-S. Doubo Gold upgrades the user-friendly functions with continuous shot mode and a shot interval control system. The Doubo technology holds 11 patents and was named a World-Class Product by the Department of Commerce, Industry of Korea.

**EnerJet2.0**

Jet Volumetric Remodeling (JVR) technology simultaneously delivers kinetic energy and a healing compound with minimum epidermal damage, enabling ideal compound spread and a controlled deep micro trauma for immediate hydration, volume and long lasting skin remodeling. This single, innovative, non-thermal and non-surgical solution is suitable for all skin types and all areas of the body. EnerJet2.0 is ideal for kinetic non-surgical face-lifts, scar tissue remodeling and dermal thickening. EnerJet2.0 solutions are proven to deliver superior, immediate and lasting clinical results, and are appropriate for all skin types year round.

**CELLACTOR SC1 »ultra« and D-ACTOR »ultra« line**

The CELLACTOR® SC1 »ultra« and D-ACTOR® »ultra« line offers an Acoustic Wave Therapy (AWT®) system for cosmetic and dermatological disorders such as cellulite, annoying fat pads, striae, scars, wrinkles and lymph congestion. The high energy acoustic waves penetrate the adipose deposits and initiate metabolic activity in the subcutaneous fatty tissue. Radial acoustic waves are applied to the skin's surface, to improve the elasticity of the connective tissue, or to smooth out wrinkles and folds. This non-invasive treatment stimulates the growth of collagen and produces a natural lifting and toning effect.

**Hyabell**

The new range of Hyabell® dermal fillers offers a long lasting improvement and a convincing safety profile. The pre-incorporated lidocaine (0.3%) facilitates the injection procedure and reduces pain, thus enhancing patient satisfaction. Hyabell fillers have considerably better visco-elastic properties and softer extrusion forces than other hyaluronic acid dermal fillers available, due to the innovative monophasic particle technology (MPT) production process. The optimized physical properties allow better clinical results.

**Adoderm GmbH: +49 (0) 2173 1019180 or visit [www.adoderm.com](http://www.adoderm.com)**

**enCurve**

The enCurve is an easy and comfortable way to reduce fat through apoptosis-inducing radiofrequency. Working via controlled delivery of energy deep into the adipose tissue, enCurve utilizes a specialized frequency (27.12 MHz) combined with the ideal 300 Watts of power to selectively target and heat adipocytes to the optimal temperature causing denaturation of cells, leading to death of adipocytes.

**Silhouette Soft**

Silhouette Soft® is a re-absorbable suture with bi-directional cones for redefining the face, reducing wrinkles and repositioning volume with minimal downtime for the patient. This unique 30-minute treatment, performed under local anesthesia, results in an immediate lifting effect and a progressive regeneration of collagen for results lasting up to 18 months. Silhouette Soft is made in the U.S. and is currently distributed in more than 70 countries.

**Sinclair Pharma:** +33 1 73 28 34 00 or visit [www.silhouette-soft.com](http://www.silhouette-soft.com)

**SculpSure**

SculpSure® is the first and only FDA cleared hyperthermic laser for non-invasive lipolysis of the submental region, abdomen, flanks, back and inner and outer thighs. The 1060 nm wavelength's specific affinity for adipose tissue, coupled with minimal absorption in the dermis, allows SculpSure to treat all skin types in 25 minutes and without downtime. Four versatile applicators can be customized into a variety of treatment configurations to meet patients' needs. Following treatment, the body naturally eliminates the disrupted fat cells with results seen in as quickly as six weeks and optimal results usually seen in 12 weeks.

**InMode**

InMode has innovative non-invasive and minimally invasive options, from the revolutionary InModeRF device featuring Radiofrequency Assisted Liposuction (RFAL) technology, to fractional skin resurfacing (Fractora), skin tightening (Forma and Plus), ultra-fast diode hair removal (Diolaze), peak power photofacial for skin pigmentation and vascular lesions (Lumecca), and cellulite reduction / body contouring (BodyFX). With InMode you can choose all or a combination of the most in-demand applications based on your unique patient demographics. Our technology continues the legacy of providing superior satisfaction for both the patient and the practice.

**InMode:** +1 855 411 2639 or visit [www.inmode.com](http://www.inmode.com)

**PicoWay**

PicoWay – now with Resolve – is a dual wavelength (532 nm and 1064 nm) picosecond system with both non-fractional and fractional capabilities, treating a wide-range of pigmented lesions and tattoos. PicoWay's unique mode of action is based on delivering ultrashort picosecond pulses of energy to the tissue. These bursts of energy create a photoacoustic impact, which breaks up the pigmentation into smaller, more easily eliminated particles.

**Aquamid**

Aquamid® Reconstruction is a non-absorbable hydrophilic gel consisting of 97.5% water and 2.5% cross-linked polyacrylamide. It is designed for soft tissue augmentation for aesthetic and reconstructive purposes and acts by adding volume to soft tissue. Aquamid gives an immediate, natural look and feel, and integrates completely into subcutaneous tissue. It does not degrade over time, and the aesthetic results will remain for years. The efficacy and safety of Aquamid have been documented in several international clinical studies.

**Contura International A/S: +45 81 100 900** or visit [www.aquamid.com](http://www.aquamid.com)

**Viveve System**

The Viveve® System is a non-surgical device that remodels vaginal tissue in a single, 30-minute, in-office procedure. This treatment satisfies patient demand for a painless solution to vaginal laxity. Vaginal laxity is associated with decreased sexual sensation and urinary incontinence. The system uses patented Cryogen-Cooled, Monopolar Radiofrequency (CMRF) technology to renew and replenish the collagen scaffolding. Viveve was the first of any energy-based device company to complete a sham-controlled study of an elective vaginal procedure.

**Viveve, Inc.: +1 262 599 6424** or visit [www.viveve.com](http://www.viveve.com)

**ZLipo**

ZLipo is an innovative Cryolipolysis™ system that makes it possible to target fat deposits and reduce them permanently and non-invasively. This method cools fat deposits over a longer period of time to a controlled and safe temperature range. ZLipo convinces with its simple and safe handling. By combining Cryolipolysis and shockwave, Zimmer offers the perfect combination treatment for significantly better fat reduction. Studies have shown that shockwave after Cryolipolysis ensures improved fat loss, stimulates lymphatic drainage and tightens skin.
