M22 ResurFX

The ResurFX module of M22 is a true, one-pass, fractional non-ablative treatment technology. Unlike other fractional technologies, ResurFX needs only one pass to be effective, saving you time and protecting the patient's skin. ResurFX uses a 1565 nm fiber laser and a very advanced scanner, which enables you to choose from more than 600 combinations of shape, size and density for optimal treatment results. Even better, your practice wins as there are no consumables or recurring procedure fees.

NS-532 Laser System

The NS-532 Laser System is a compact, portable and affordable FDA cleared 532 nm laser system for the safe and effective treatment of pigmented and vascular lesions on all skin types. NewSurg offers honest value and generous trade-in credit for old Iridex, Laserscope and Pulsed Dye Lasers, towards the NS-532 Laser System. This system sets a new standard in the evolution of simple and efficient aesthetic laser treatments.

NewSurg: 215-822-7722 or visit www.NewSurg.com

Alma-Q

With both 532 nm and 1064 nm wavelengths, Alma-Q features Q-switched, long pulse and double pulse modes on a single dedicated platform to treat a wide-range of indications. The high powered Q-switched laser is effective in removing natural or artificial pigmentation while minimizing the risk of damage to surrounding tissue. Approved for all skin types, Alma-Q is FDA cleared for tattoo removal, skin resurfacing and hair removal, and can also be used to treat benign pigmented lesions, benign vascular lesions, wrinkles and *pseudofolliculitis barbae* (PFB).

DefenAge Clinical Power Trio

A comprehensive multicenter clinical study shows that DefenAge's core skincare regimen (exclusive ingredient Age-Repair Defensins®) addresses visible signs of skin aging on a global scale (randomized, placebo/vehicle-controlled, double-blinded study; 44 participants). This wide-ranging visible improvement of aging skin was confirmed by multiple advanced methods of evaluation of skin conditions including histopathology and high-resolution skin ultrasound. The study was performed by Amy Forman Taub, M.D. (PI), Vivian Bucay, M.D. and Gregory Keller, M.D.

Halo

Halo is the world's first Hybrid Fractional Laser that delivers a non-ablative and ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime. The non-ablative wavelength of 1470 nm is tunable from 200 to 700 microns, the optimal depth for treating the epidermis and papillary dermis. The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 microns.

ProGen PRP

Many platelet-rich plasma (PRP) systems are available on the market today, but not all are created equal. The Bellus Medical ProGen™ PRP system is recognized as the most flexible, validated kit in the marketplace that can deliver 2x and 5.1x PRP and validated 5x concentration of growth factors. Its flexibility, combined with single spin options, a reduction in procedure time and consistently repeatable results, offers the best value in the PRP market. This adaptable system grows with your practice as your demands for validated concentration levels and need for larger quantities of PRP evolves. Learn how you can optimize your PRP business with the Bellus Medical ProGen PRP system.

Oxygenetix

Oxygenetix is a breathable foundation / camouflage designed to help heal and conceal a wide variety of skin conditions. Founded in Beverly Hills, Calif., Oxygenetix is used daily on and off the set by Hollywood's elite. This post-procedure cover-up reduces and eliminates social downtime following aesthetic procedures – the main reason many patients choose not to proceed with laser, peel, needling or dermabrasion treatments – thereby increasing your consultation to procedure conversion rate.

Oxygenetix Institute, Inc.: 888-500-1672 or visit www.oxygenetix.com

LightPod Neo

Aerolase 650 ms laser technology offers a new approach for highly effective, long lasting results for treating active acne including problematic conditions such as nodulocystic acne and acne conglobata. This new treatment option offers an efficacious solution for patients who have not been able to use or have not responded to traditional therapies. Aerolase laser technology allows immediate results, is uniquely gentle and sanitary, and offers maximum versatility for both adolescent acne and adult acne.

Collagen P.I.N.

Collagen P.I.N. is a new innovation in advanced collagen induction therapy that introduces a controlled wound into the skin triggering the release of natural growth factors, new collagen and elastin. Automated microneedling causes less damage to the epidermis than dermal rolling, laser or other ablative treatments. Utilizing Collagen P.I.N. with our Induction Therapies clean, clinical products (specifically designed for use post microneedling) minimizes complications and provides quicker healing and longer lasting results. More needles. More power. More depth. More collagen.

Collagen P.I.N.: 877-746-4407 or visit www.collagenpin.com / www.inductiontherapies.com

Dynamis Pro

This all-in-one, anti-aging laser platform allows fast, precise and efficient procedures with reduced recovery times. With fully customizable settings, the system achieves true third-generation Er:YAG resurfacing. The Nd:YAG wavelength is a gold standard in wrinkle reduction, acne, pigmented and vascular treatments. Nd:YAG and Er:YAG scanner compatibility further enhances treatment speed, safety and efficacy, especially for large treatment areas. The SP Dynamis combines popular aesthetic applications with additional minimally invasive surgical procedures (laser lipolysis, etc.).

BTL Vanquish ME

Further improving on its patented non-invasive Vanquish technology to reduce stubborn fat around the midsection, BTL Aesthetics introduces its newly engineered BTL Vanquish ME (Maximum Energy). This latest iteration takes body contouring to the next level with increased tuning performance, more concentrated thermal energy and less scatter to non-fatty tissue than previously possible. The result is a more homogeneous heating leading to higher overall temperature elevation. A large spot size is designed to treat the whole abdomen from flank to flank during one session.

BTL Industries: 866-285-1656 or visit www.btlaesthetics.com

Epionce Daily Shield Lotion Tinted SPF 50

The new Epionce Daily Shield Lotion Tinted SPF 50 sunscreen provides sheer broad spectrum protection that evens out skin tone while imparting a natural-looking healthy glow. Perfect for all skin types – even sensitive skin – this very water resistant formula is enhanced with botanical ingredients for antioxidant benefits. Epionce Daily Shield Lotion SPF 50 is ideal for daily use alone or under makeup to provide optimum protection from UV exposure.

ThermiRF

ThermiRF® is a platform technology that combines temperature control with advanced real-time temperature monitoring to enable various non- and minimally invasive aesthetic applications. Physician control makes the ThermiRF a customizable platform technology.

Thermi, LLC: 866-981-5017 or visit www.thermi.com

Envy Medical

Envy Medical was born out of a demand for safer alternatives to treating today's greatest skin concerns. Dermalinfusion treatment technology, and a concise range of daily at-home skincare products, support the high standards of industry professionals while maximizing patient satisfaction with visible results. Envy Medical's products are powered by ingredient discoveries including Lumixyl® peptide, the tyrosinase-inhibitor researched and developed by Stanford University that is clinically-proven to safely address, control and prevent hyperpigmentation. Choose Envy Medical for results that retain patients and build your practice without compromising skin's delicate balance.

or visit www.envymedical.com

Clinicians Complex Skin Bleaching Cream

Clinicians Complex 6% Skin Bleaching Cream is designed to help lighten skin discoloration and pigmentation, combining a blend of hydroquinone, kojic acid dipalmitate and arbutin. Hydroquinone is a proven ingredient for lightening/brightening of age spots, brown spots, melasma and other skin discolorations or pigmentation problems. Kojic acid dipalmitate is an improved form of kojic acid, and has the ability to help reduce the activity of tyrosinase in human skin, thus inhibiting melanin formation. Arbutin represents an important advancement in the category of skin lightening agents with its primary mechanism also involving tyrosinase inhibition. The formula also contains vitamins C & E.

COSMED Dermaceuticals: 866-420-6569 or visit www.cosmedderm.com

Viveve System

The Viveve® System is a non-ablative device that remodels soft tissue in a single, 30-minute procedure. This system uses patented cryogen-cooled, monopolar radiofrequency (CMRF) technology to create a reverse thermal gradient that penetrates deep tissue while protecting surface layers.

Viveve, Inc.: 262-599-6424 or visit www.viveve.com

Soprano ICE

The Soprano ICE laser hair removal platform combines three wavelengths in a single system – 810 diode, 755 Alex and 1064 Nd:YAG – allowing practitioners to treat the widest range of patients and hair types all year round. It is FDA cleared for skin types I-VI and tanned skin. Based on clinically-proven SHR technology, the award-winning Soprano ICE enables you to administer treatments quickly and comfortably. With more than seven years of clinically-proven effectiveness, Soprano ICE users are able to provide the best possible clinical results for their patients.

Z Wave

The Zimmer Z Wave constitutes the latest development in the treatment of cellulite. Utilizing soft pulse technology to enhance patient comfort, it delivers mild, consistent sound wave therapy to the target area over a series of treatment sessions. The Z Wave is FDA cleared for the temporary reduction of the appearance of cellulite. Typical patient treatment time is 3-4 minutes per body zone.

Zimmer MedizinSystems: 800-327-3576 or visit www.zimmerusa.com

EDGE

The EDGE fractional laser offers a superior solution for rejuvenating and resurfacing skin and tissue. EDGE can be used to treat fine lines and wrinkles, acne and surgical scars, skin pigmentation and discoloration, sun damage, uneven skin texture and atrophy. EDGE offers a selection of fractional spot sizes for optimal energy delivery, along with convenient controls on the handpiece for adjusting pattern shape and size.

Perigee Medical: 844-PERIGEE (737-4433) or visit www.perigeemedical.com

Phoenix CO₂

The Phoenix CO₂ is priced under \$35,000 and can be used to remove uneven pigmentation and reduce fine lines and coarse wrinkles. Depending on which handpiece is attached, the Phoenix-15 can cut, coagulate and vaporize soft tissue. The Phoenix CO₂ features one of the largest scan patterns in the industry and can resurface both hands in under two minutes.
